SUMMARY

Self-taught Full Stack Developer with over 3 years of experience in building scalable, high-performance web applications mainly using Next.js, Node.js, Vue, React, TypeScript. Skilled in designing user-centric solutions within Online Travel Agency (OTA) and Customer Relationship Management (CRM) systems, focusing on usability and efficiency user experience. Passionate about continuous learning and solving complex technical challenges.

EXPERIENCE

03/2024 - 04/2025

Software Developer
Wingie Enuygun Group ↗

Wingie Enuygun Group is a leading travel-tech company in the MENA and Turkey regions, offering flight ticket search, comparison, and booking services to millions of users through platforms like wingie.com and enuygun.com.

- Technologies: GraphQL, Strapi, Node.js, TypeScript, Next.js, Tailwind CSS
- Maintained and improved the company-wide Design System, ensuring UI consistency and component reusability across Enuygun's web platforms.
- Contributed to building and maintaining a no-code panel that enabled effortless creation of SEO-optimized pages, improving content team efficiency and enhancing organic search performance.
- Contributed to the technical management and optimization of company blog platforms (enuygun.com/bilgi and wingie.com/blog), supporting SEO strategies and ensuring scalable, maintainable content architecture.
- Supported team development by mentoring junior engineers and participating in peer code reviews.
- Delivered a company-wide presentation on internationalization (i18n) best practices to frontend developers, promoting standardization and improved localization across products.
- Played a key role in improving page load performance by 45% through the implementation of Memcached, optimizing data retrieval and reducing server response time.

09/2023 - 03/2024

Junior Software Developer
Wingie Enuygun Group ↗

- Worked on improving user interfaces and user experience by enhancing UI/UX designs and integrating new features.
- Led the end-to-end development of a scalable, multi-language FAQ system used across 13 markets in 5 languages (e.g., wingie.com/faq, sa.wingie.com/faq). Integrated region-specific SEO strategies to enhance international visibility. Utilized Node.js, GraphQL, Next.js, Strapi, and Elasticsearch to ensure performance, flexibility, and maintainability.
- Contributed to the implementation of Wingie's redesigned homepage by translating design mockups into responsive, high-performance UI components.

04/2023 - 09/2023

Sofware Developer
Siliconmade Academy ↗

Siliconmade Academy is a non-profit organization that provides hands-on, industry-oriented software development training through real-world projects.

- Technologies: Laravel, Vue.js, MySQL
- Student Portal: Designed and implemented a user-facing system where students can register,

make tuition payments, and receive real-time notifications related to their courses and schedules.

- Sales CRM: Developed a CRM panel for sales representatives to manage and convert leads collected from multiple sources (e.g., Facebook, Instagram). The system allowed sales staff to track lead status, communicate with prospects, log interactions, and monitor sales performance through tailored dashboards.

11/2022 - 04/2023	**Junior Software Developer**
	Siliconmade Academy ↗

- Improved UI/UX and enhanced responsive layout structures to ensure a seamless and consistent user experience across all device types.
- Designed and implemented a comprehensive notification system that supported email, SMS, push notifications, and in-app reminders—boosting user engagement and timely communication.

08/2022 - 10/2022	**Back-End Developer Intern**
	Jotform ↗

Jotform is a leading online form builder used by millions of individuals and businesses worldwide to create forms, collect data, and automate workflows.

- Technologies: Node.js, MongoDB, Telegram Bot API
- Developed a real-time Telegram bot that enabled users to fill out and submit Jotform forms directly within Telegram, offering a seamless and innovative user experience outside the traditional web interface. Presented the project to the company-wide engineering demo, receiving positive feedback for its originality and potential to expand form accessibility through alternative platforms.

EDUCATION

10/2017 - 08/2022	**Business Administration**
	Dokuz Eylul University
	Bachelor's Degree
	Cumulative GPA: 2.52 on a 4.00 scale

CERTIFICATES

03/2022 - Present	**Advanced Full Stack Software Development** ↗
	Siliconmade Academy

07/2021 - 03/2022	**Full Stack Software Development**
	Sliconmade Academy

04/2021 - 06/2021	**Fundamentals of Programming**
	Siliconmade Academy

SKILLS

React JS (Next JS)	PHP (Laravel)
Vue JS	GraphQL
Typescript	Efficient AI-Driven Development & High Delivery Speed with Claude AI & Cursor IDE
Node JS (Express - Strapi)	
Tailwind CSS	Unit Testing & End-to-End (E2E) Test Integration

UI/UX & Design System Maintenance

Performance Optimization & Caching Strategies

API Development & Integration

Full-Stack Development
